

While aesthetics are important, entry doors must also be functional, durable against the elements and provide security. FMI BI's impressive range of premium-grade aluminium doors have a depth of 50mm making them 25% thicker than any other door available in New Zealand. We also have quality handles and locks that are ideal for both traditional and modern homes.

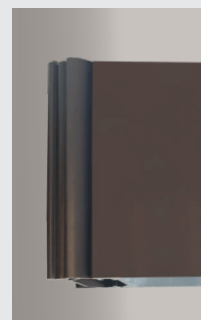

Villa Doors

The Villa Door Range perfectly matches period homes with the look and feel of an elegant bygone era. These doors are all made to order.

Villa doors are hand made and create a sense of traditional elegance with decorative moldings and optional glass insets that add character.

*Left: Villa door in White with bevelled moldings and Cathedral Glass inset
Plymouth Handle Set*

Above: These mouldings are available in bevelled edges for a more classic look and on the right, in simple straight lines for an elegant, clean appearance.

Element Doors

The Element Door is for those who want a statement door with clean lines and minimalist aesthetics. These toughened double glass doors in a slim frame and are available in bold colours or moody glass tints.

Element Doors are constructed by bonding toughened glass sheets to a rigid aluminium frame.

These doors are the latest in contemporary style and can be crafted using a solid back-painted finish for a pop of colour. Colours can be matched to a tone of your choice and colours can even differ on the inside and the outside. The doors can also be in clear, tinted or obscure glass.

Shamrock Green

Aeonox Grey Friars

Brilliant Yellow

Horizontal 2 Groove Doors

The versatile aluminium door with two understated horizontal lines creates a contemporary look, perfect for the modern home.

PLATINUM
DOORS

Double Grooved Doors have simple lines that add to the character of a panel. These doors are great for a modern look to an entrance.

Left: Double Grooved in Viper Green from the Brights Range with the sleek Artus Smart Entry lock

Bondi Blue

Aeonox Titania

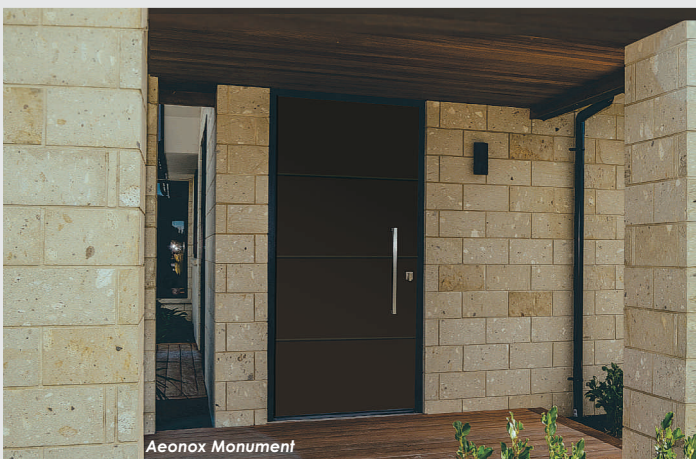

Horizontal 3 Groove Doors

The three horizontal grooves add character to a modern, solid panel door design - perfect for a bold statement entry.

The Three Grooves add a modern treatment to any home entry. They have a bold look in one of the Aeonox colours or with a pop of colour from the Brights colour range.

Left: Horizontal 3 grooved in Jaybird blue and a Verta Pull Handle Set

T & G Vertical Doors

The aluminium TGV range replicates the traditional style of a wooden tongue and groove door.

PLATINUM
DOORS

Tongue & Groove doors create a classic look that can present itself as a wood like finish or a monochromatic look in the Aeonox range. The T&G doors can even become bold entries in one of the Brights colours.

Colours & Finishes

FMI BI has a range of advanced methods of applying colours and finishes. These include powder coating and sublimation which allows an almost endless array of possibilities for door colours and finishes to suit any style or preference.

Aeonox Standard Range

AEONOX is FMI BI's standard range of powder coating colours and uses breakthrough, tough, scratch-resistant powder coat technology. The advanced formulation with a super-fine texture finish protects the surface from nature's elements, the wear of everyday living and protection during installation.

Sublimation Finish

FMI BI's sublimation finish technology provides an additional layer on top of powder coating to simulate a wood-grain finish with the look and feel of timber. Unlike real wood, the sublimated finish has long-lasting, paint-free durability and is virtually maintenance free.

Below are FMI BI's wood appearance finishes that make up the range:

Brights Range

The striking FMI BI Brights range of powder coat colours is specially formulated to be UV resistant to reduce fading.

Please Note: Colours displayed are a guide only. Whilst every care has been taken to replicate colours these are not necessarily colour accurate. We recommend that you use production line colour swatches for final colour selection and approval. Sample chips are available from our fabricators.

Sidelights

Sidelights create a spacious feel to a home entry and add more natural light to the interior. They match the entry door, come in a variety of sizes and can be on either side or both sides of the door.

Right: sidelights with opalescent glass
Centre: tinted Cotswald glass
Far right: glass with Grey tint
